Plumbing Service Technician

Pay Range: \$26 - \$40 per hour

Reports to: Plumbing Service Manager

Job Summary:

Service Plumbers troubleshoot, repair, and maintain plumbing systems. This includes fixing leaks, clearing clogs, and performing general maintenance on pipes and drainage systems. Key tools include leak detectors and sewer cameras.

Key Responsibilities:

- Install, repair, and maintain plumbing systems and fixtures in residential and commercial spaces.
- Work with contractors and follow blueprints.
- Respond to plumbing emergencies.
- Perform light construction as needed (carpentry, flooring, etc.).
- Estimate job costs and maintain accurate records.
- Participate in on-call rotation, including nights, weekends, and holidays.
- Attend job-related training and collaborate with the team.

Physical Requirements:

- Regularly lift up to 50 lbs and perform physical tasks like climbing ladders, stooping, and kneeling.
- Must work in varied conditions, including confined spaces, roofs, and exposed environments.
- Willingness to undergo drug/alcohol testing if required.

Travel:

- A company vehicle is provided for work hours and on-call duties.
- Must maintain a valid driver's license.

Qualifications:

- High school diploma or GED.
- State plumbing license and 1-3 years of experience as a journeyman plumber.
- Must have own tools and knowledge of plumbing materials (PVC, copper, etc.).
- Strong communication, problem-solving, and customer service skills.
- Ability to work independently, follow blueprints, and perform basic math.

Other Notes:

This description covers key duties but is not all-inclusive. Tasks may change as needed.
